

9100

9100 with
backlit
topper

In the mid 90's, Triton took the ATM industry by storm with the release of its 9500 model ATM. It was the first low-end, off premise ATM the marketplace had seen and it quickly became an icon.

History repeats itself with Triton's new 9100 series ATM. Designed from the ground up to be dollar-for-dollar, the lowest cost ATM in the industry, it features Triton's unparalleled reliability.

The best low cost ATM in the industry, bar none.

It also features Triton's own TDM-100 dispensing mechanism, incorporating state-of-the-art electronics and a host of features like locking cassette and automatic error recovery designed to maximize uptime.

And even though the 9100 features the lowest cost of ownership in the industry, it still incorporates many of the industry's tightest security features, such as Encrypting Pin Pad (EPP) and Triple DES, the new standard for PIN encryption.

Triton's 9100 is simply the best low cost ATM in the industry, bar none.
