

FT5000

FT5000

For decades, the banking industry has trusted Triton for innovative technology that's practical and cost-efficient, and Triton has delivered again with the FT5000, a versatile through-the-wall ATM that offers high performance for a surprisingly low price.

A traffic-building and reliable through-the-wall ATM you can afford.

Our long-time experience with the cost-conscious banks and credit unions led us to develop this model designed with the financial industry in mind. With an Encrypting PIN Pad (EPP), rear access, and full ADA and Triple DES compliance, the PC-based FT5000 also supports XFS, emulation and a variety of communication protocols.

But what makes the Triton model FT5000 most popular with banks and credit unions is its highly cost-efficient operation. Financial institutions can choose from one to four cassettes based on traffic and can count on the reliable operation that has made Triton a leader in the industry. Plus, the Microsoft CE Windows® operating system makes possible a long list of revenue generating value-added services.

Performance. Reliability. Easy and inexpensive service. Thanks to Triton, there's finally a through-the wall unit made just for you.

FT5000 IN DETAIL

Designed with Financial Institutions in Mind

FEATURES:
